1. The BRIDGE- Connecting Mobility and Disability - A Project dealing with the mobility problem of youth with disabilities. The project's main aim is to enable youth with disability to actively participate in creating and developing civil society by joining events and other activities, which will be prepared with proper conditions to travel and experience things that weren't available for them before.

2. On December 8th-9th Charlene was in Brussels attending the Youth Forum Jeunesse Info& Networking Days on Social Inclusion. It was a great experience for her and also for the project as it opened up to the external AEGEE world! More concretely this is what happened - The Bridge: Connecting Mobility and Disability got (together with another project) the best practice project by YFJ Member Organisations. And so, after giving a presentation on AEGEE and on the Project, there was time for a whole afternoon to discuss the Project and topics related to social inclusion. At the end of the days, Charlene had to answer lots of questions, as all the participants were so much interested in The BRIDGE!!!

Besides this, this month The BRIDGE Team was also working closely with the SUCT! Lots of discussions took place and ideas were flowing from one email to the other. Results: the SU & Disability Questions on the SU Form was updated, and we urge you to reflect upon the Disability Issue when applying for the organisation of a SU. And how are you going to reflect? Open your General Mail, and read the SU paper, which you find in the envelope. It contains all the information related to SU and on the backside, information about The BRIDGE and SU.

Concluding, a SPECIAL THANKS goes to the incredible SUCT for their constant support towards the Project!!!
